

## TYPICAL PROPERTIES OF AP THERM® FF

PARTICULARS	AP THERM® FF
Temperature	(12 to 400°C) (53 to 752°C)
Composition	Synthetic Hydrocarbon
Appearance	Amber to Clear
Flash Point (COC)	120°C/250°F
Auto Ignition Temperature	ASTM E-659 355°C
Boiling point	228°C / 343 °F
Moisture content	100 PPM
Kinematic viscosity @ 40 °C	2 - 5 mm <sup>2</sup> /s (cSt)
Pour Point	-30°C

The provided data are based on laboratory-tested samples and may not be applicable to all samples. For detailed sales specifications of AP THERM® FF fluid, Please reach out to us. This information does not constitute an express warranty.
